MAX®

Lighter weight, less stapling effort for easier operations

We have succesfully renewed the current HT-B to weight less and to operate easier.
We are confident to meet all of customers' needs with the new model.

Light stapling efforts:
50% less than the current model
Light stapling improves productivity and reduces the risk of wrist fatigue.

New Engineered plasticcover avoids any vines from jamming in the hook

Wider space for easier tape placement

New fixed pusher unit prevents losing the pusher

Easier to remove the jammed staples from the front side

New durable hinge with steel shafts inserted to increase durability

Weight:
20% less than the current model
New tapener weighs only 420g, lightest weight in its class.
